LUMA SURVEILLANCE

Technical Note: Memory Card Support

Some Luma IP cameras have slots that can hold microSD or TF memory cards. These cards are used to store data locally, and are an ideal means to preserve surveillance data when the network goes offline or the NVR is being serviced.

The SD cards listed below have been tested with Luma IP cameras and work properly. Other brands and models may also work, but they have not been tested; use at your own risk.

Models with Card Slots

LUM-300-DOM

LUM-500-DOM

LUM-500-BUL

LUM-700 series
