

HydraPort: Connecting the Perfect Meeting

For a meeting to be perfect, people need a convenient way to connect their devices to the system and share content. This is not as simple as it seems, as evidenced by the countless conference rooms you see with cables strewn across the table or hanging in tangles underneath. That's why AMX developed the industry's most effective and flexible architectural connectivity solution: HydraPort®.

CLEAN AND SIMPLE

**HydraPort Flush-Mount
Connectivity Solution**

HydraPorts provide a simple way to connect AV control, network and power directly from the conference table – with an elegant form factor that complements any room. Just plug in your laptop, USB memory stick or other mobile device, and you're connected. All HydraPorts are designed to avoid unsightly cables above and below the table so your conference room or classroom always sports a professional look.

HydraPorts are fully modular, allowing you to configure each one for that room's specific connectivity needs. AMX offers all the popular connection modules, including Ethernet, USB, HDMI, VGA and AC power – including a multi-region power module that fits over 90% of international power plugs! The modular assembly makes it easy to change connections as needs evolve, and makes HydraPort® future proof for connection types that have yet to be developed.

**HydraPort Retractable
Connectivity Solution**

IN CONTROL

In addition to connectivity and power modules, you can install Metreau keypads directly in the HydraPort and control the room from the conference table. This is ideal for smaller rooms like Huddle spaces that lack a touch panel, or rooms with large tables where you want additional control points. The HydraPort supports the entire size range of keypads for ultimate flexibility.

**Metreau
7-Button Keypad**

LET ME RETRACT THAT

**HydraPort Retractable
Cable Module**

The HydraPort family also includes Retractable Cable Modules for HDMI, RGB with Audio, DisplayPort and Ethernet. These ingeniously designed modules organize and hide cables beneath virtually any type of conference table, including narrow tables and those with glass surfaces, and are 85% smaller than competing solutions. These modules come with high quality flat cables already installed to ensure the absolute best picture or video quality from a smaller sized package. Just pull out the cable you need, connect your device and share your content. When the meeting's over, disconnect the cable, push a button – and the cable smoothly retracts into the HydraPort. You're leaving the table neat and clean for the next meeting.

THE RIGHT SOLUTION FOR ANY ROOM

Whether you are outfitting the most sophisticated boardroom, the most technologically advanced conference room or the smallest collaborative space, AMX has an architectural connectivity solution to meet your needs. Visit amx.com to learn more.
