

Quick Set-Up Instructions

Diversity Fin™ Antenna
Install Version
UHF Wireless 470-698 MHz

1. Attach TWO coax cables from the antenna to BOTH receiver inputs. Use good quality 50Ω, low loss coax cables of equal length.
2. Drill mounting holes and screw L bracket to wall using provided screws and drywall inserts if needed.
3. Adjust Diversity Fin angle and height to achieve line of sight to stage or primary wireless area. Straighten whip antennas, as shown.
