AUTONOMIC

Control4 INTEGRATION

WITH MIRAGE AUDIO SYSTEM

The Mirage Audio System integration with Control4 enables users to efficiently play back their personal music collections in addition to the most popular online streaming music services directly from the Listen menu on Control4 Navigators. Users have direct access to the exclusive TuneBridge® functionality which allows users to jump sources dependent on what's playing, opening up the universe of music with expanded search and discovery features built-in to each streaming service. For more advanced browsing capabilities, queue, playlist and favorite management users have access to control the system through the Mirage Media Controller app for iOS/Android. At a profitable margin enjoyed by the custom channel, the Mirage Audio System is the right solution to increase your bottom line while delivering supreme sound quality into a complete home automation system.
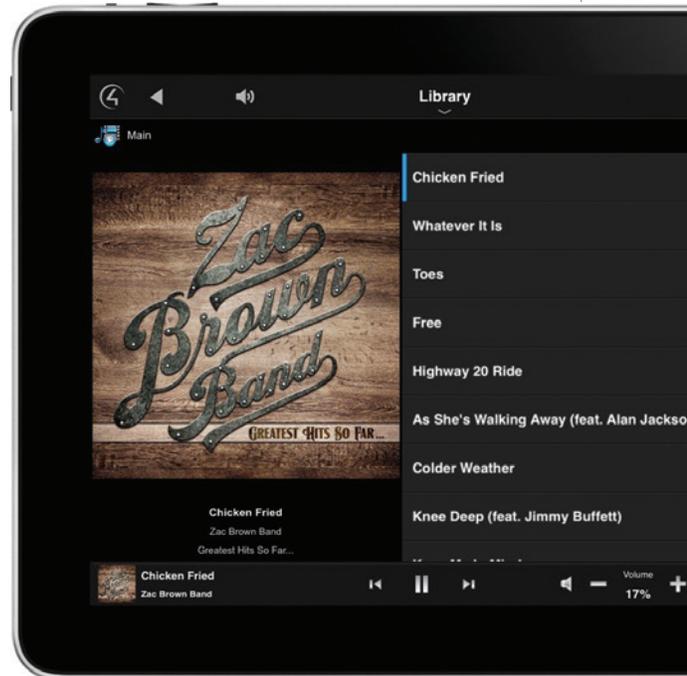

MIRAGE
AUDIO SYSTEM
