

## BOSE® FREESPACE® 3 LOUDSPEAKER SYSTEM

*A high-quality, Virtually Invisible® business loudspeaker system with full, rich sound for music or paging and superb flexibility allowing for expansion and/or custom configurations.*

### YOUR BUSINESS NEED

### THE BOSE SOLUTION

*Speakers that virtually disappear*

The FreeSpace 3 loudspeaker system is engineered to be heard, not seen. It includes up to four Virtually Invisible® cube speakers, each about the size of a coffee mug, and a patented Acoustimass® module for bass that can be hidden completely out of sight.

*Sound quality that people expect*

Now that better-sounding music systems are commonplace in most businesses, people expect quality sound wherever they go. Why let inferior speakers annoy them? The Bose FreeSpace 3 speaker system reproduces clean, crisp highs from tiny cubes, while the Acoustimass module provides deep, full bass.

*A speaker system that grows with your business*

The Bose FreeSpace 3 speaker system is designed to meet the ever-changing needs of your business. Use it as a stand-alone system – in mono or stereo – in rooms up to 45,000 cubic feet. Or easily configure it into a larger distributed system.

*Speakers that are easy to install*

All elements of the FreeSpace 3 speaker system come with custom-designed brackets for easier, safer installation on walls or ceiling.

*Safety and reliability*

The FreeSpace 3 speaker system is covered by a five-year, transferable limited warranty.
