

Enjoy the highest quality sound and video on a **Dragonfly Thinline™ Ultra AcoustiWeave** projection screen. Your speakers hide behind the 4K optimized, acoustically transparent material to create the ultimate theater experience in the comfort of your home.

Our Thinline model features a nearly edgeless 7mm (0.28") thin bezel frame, giving you the sturdy strength of an on-wall screen without the bulk.

Our 4K Ultra AcoustiWeave technology incorporates a tightly-woven fabric that eliminates moiré, or image distortion, often seen on other acoustically transparent screens.

FEATURES

SLEEK SILHOUETTE

Our thin, felt-covered bezel nearly disappears, keeping your focus on the image. The design replicates a flat-panel screen with a larger-than-life display.

HIDE THE SPEAKERS, NOT THE SOUND

Our acoustically transparent material is engineered to hide speakers behind the screen without damping sound quality, providing a truly cinematic feel.

WIDE VIEWING ANGLE

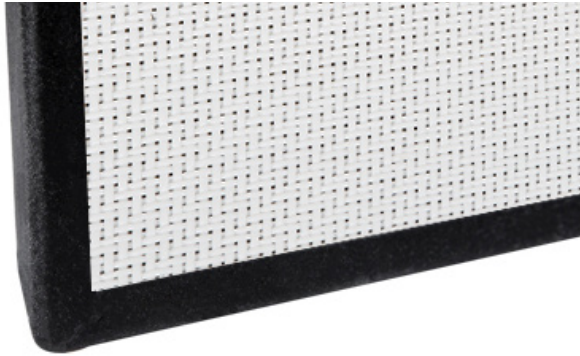

Our screens deliver a wide viewing angle of up to 160°. Not only does the wider spectrum prevent image distortion, it ensures that all of your guests have the best seat in the house.

SHARP PICTURE

Ultra AcoustiWeave screens are optimized for 4K viewing due to a tight fabric weave that produces crisp lines. Our reflective material and attached black scrim promise a clear picture and deep image contrast.
