

For crisp picture quality in a minimalist package, use a **Dragonfly Thinline™ Ultra White** projection screen and enjoy enhanced resolution and more vivid colors that maximize any viewing experience.

Our Thinline model features a nearly edgeless 7mm (0.28") thin bezel frame, giving you the sturdy strength of an on-wall screen without the bulk.

FEATURES

SLEEK SILHOUETTE

Our thin, felt-covered bezel nearly disappears, keeping your focus on the image. The design replicates a flat-panel screen with a larger-than-life display.

BRIGHTER WHITES, BETTER COLORS

Our Ultra White screen offers enhanced resolution for all applications. Whites look brighter and colors have more contrast, providing you with a truly stunning visual experience.

WIDE VIEWING ANGLE

Our screens deliver a wide viewing angle of up to 160°. Not only does the wider spectrum prevent image distortion, it ensures that all of your guests have the best seat in the house.

SHARP PICTURE

Our smooth and textureless Ultra White screen material is optimized for 4K viewing, delivering a crisper, brighter image over standard 1080p matte white material.
