ES-700-TWR-6-BLK

Tower Speaker

► IN-ROOM

As beautiful to look at as it is to listen to, the Episode ES-700 Tower speaker combines an elegant cabinet with premium components for true full-range performance. Whether used for pure two-channel listening rooms or as part of a multi-channel home theater system, two independently channeled down-firing ports provide amazingly controlled, detailed low frequency performance. Combined with the accurate, open soundstage produced by the 1-inch catenary dome titanium tweeter, the result is impressively full sound not usually associated with such a small tower.

The Beauty Queen

As pretty to look at as they are to listen to

- High-gloss black finish and discreet out-of-sight dual bottom ports creates a sleek, elegant tower
- Dual active un-pressed NCS (Natural Cell Structure) woofer material reinforced with Kevlar® provides accurate, uncolored, acoustic performance.
- Titanium Catenary dome tweeter delivers a wider, more engaging soundstage with an open, forward sound.

Episode: Real Performance for the Real World. The ES-700 Series In-Room Speakers are designed to meet the demands of critical listeners and are equally capable as a music or home theater speaker. Its high-performance components and build quality offer unbelievable clarity and detail. As the most sophisticated speaker in the ES line, the 700 Series Speakers will deliver a wide, natural soundstage and exceptionally dynamic sound every time.
