

# CINEMA 400 SOUND BAR Klipsch®

Using Klipsch proprietary technology and offering easy installation, the Klipsch Cinema 400 Sound Bar is a simple solution to seriously upgrade your TV sound and hear every detail of your movies and music.

## EASY PLUG AND PLAY SET UP

The Cinema 400 sound bar is designed to quickly connect to your TV. Simply plug in the included HDMI cable or an optical cable to your TV's corresponding output and enjoy.

## SLIM PROFILE DESIGN

Unlike most soundbars that are plastic, the Cinema 400 is crafted using high-quality wood materials. Measuring only 2.8" inches tall, the Cinema 400 is designed to fit unobtrusively below your TV regardless of wall mounting or table top use.

## LEGENDARY KLIPSCH ACOUSTICS

Two 1" tweeters with 90° x 90° Tractrix® horns deliver crisp highs, while two redesigned, high output 3" woofers round out the enhanced sound with clear vocals and dynamic soundtracks. Horn loaded drivers direct the sound to more efficiently bring the detail to the listener.

## DOLBY AUDIO® DECODING BUILT IN

The built-in Dolby Audio® Decoder formats all your Dolby Digital content to provide a detailed, powerful cinema experience.

## CLASS-LEADING 8-INCH WIRELESS SUBWOOFER

The Cinema 400 comes with a wireless 8" subwoofer that you can place anywhere in your room. Wireless 2.4 GHz technology automatically connects the sound bar and the subwoofer together. There is also a subwoofer output meaning you can add a second subwoofer to your setup or simply replace the included wireless subwoofer with the subwoofer of your choice.

## BLUETOOTH® WIRELESS TECHNOLOGY READY

Works great with all Bluetooth-enabled smartphones, tablets and computers - allowing you to play music direct from your device.

## DIALOG / SURROUND / NIGHT MODES

Klipsch enhanced virtual surround gives you an engulfing surround sound effect without all the additional speakers and wires. Dialog mode increases dialogue volume for enhanced vocal clarity without increasing ambient sounds. Night mode adjusts dynamic range for quieter listening environments.

## WIRELESS REMOTE CONTROL

The full size wireless remote controls volume, input selection and allows you to easily adjust subwoofer level independently.
