A New Way to Network

Araknis understands the importance of modern, seamless connectivity. Whether it's media streaming, surveillance, teleworking, or file sharing – our professional-grade switches provide fast, reliable network connections for all your devices. In addition to high-speed reliability, your personal integrator can troubleshoot any issues quickly and remotely, ensuring optimal performance at all times. Discover Araknis – the network that works for you.

FAMILIES

•110 SERIES
This Unmanaged+ 110-series combines the speed and reliability of a standard Gigabit switch with cloud management platform capabilities for remote diagnostics.

•210 SERIES
If you need Power over Ethernet for a few wireless access points or cameras, then opt for the 210 series switch – a partial PoE option with easier installation, fewer wires, and enhanced flexibility.

•310 SERIES
When your project demands the most powerful solution, there's only one choice – the fully managed 310 switch. Araknis Networks' most robust series, it offers full software management and optional Full-POE for large installations.

1 GIGABIT
