

Confidea F-DV Mike

Confidea Flushmount Delegate Voting Unit

Description

The Confidea F-DV is Televic's delegate panel for basic discussion systems, with an integrated speaker and electronic voting.

Its small form factor, housed in an elegant casing, permits a minimalistic integration into any meeting room furniture. The integrated speaker creates a distributed sound field in the meeting room, increasing intelligibility without the need for an additional room sound system.

The panel has a microphone connector to fit the new push-and-lock Mike microphone that reduces setup time. A 3.5 mm jack socket is available to connect headphones or a hearing loop for the hearing impaired.

The voting systems includes 5 voting buttons and an RFID card reader for identification and authentication. The chairperson version of this panel has additional controls (see Confidea F-CV Mike 71.98.0542).

Benefits

The Confidea F-DV Mike is a sleek and discreet solution that is perfectly suited to conference rooms without an existing sound system. The ability to connect headphones provides accessibility for the hearing impaired. The range of 5 voting buttons allows for easy and detailed voting options.

The unit is available in a variety of custom colors, sizes and finishes to blend in neatly in any environment. The Confidea F-DV Mike is backed by the Plexus® network and redundant cabling to ensure maximum reliability. Finally, its shielded microphone is immune to mobile phone interference.
