

Release Notes: Visualint Line NVR

V7.4.0

Priority: **MODERATE**

Released: 2017/09/06

This firmware is required to get full functionality from your Visualint Line NVR and IP cameras! This firmware adds several enhancements, and fixes a number of issues.

Models Affected

VI-L-4-2000R, VI-L-8-2000R, VI-L-8-4000R, VI-L-16-4000R, VI-L-16-6000R, VI-L-32-8000R, VI-L-32-16000R, VI-L-24TB, VI-L-32TB, VI-L-48TB

Enhancements

1. Ability to connect channels from other "Line" servers as IP cameras.
2. Interactive map of the facility (Emap) for an additional monitor.
3. Reaction "Send an HTTP request" has been added (currently only for the Micro NVR).
4. Condition of reaction "External event" has been added (currently only for the Micro NVR).
5. "Sound alarm" reaction has been implemented for the 64-bit version.
6. IP cameras support list was extended.

Issues Resolved

1. Video freezing on some cameras during playback.
2. Server search error.
3. Crashing Observer during cyclic monitor operation.
4. The password could not be saved in client settings.
5. Observer hangs under Windows 10.

Known Issues

1. Requires client version 7.4 and higher for some features to work.
